OF ENGLISH-SPEAKING MINORITY COMMUNITIES IN QUEBEC

## CHARACTERISTICS OF THE POPULATION

## HEALTH HABITS AND BEHAVIOUR

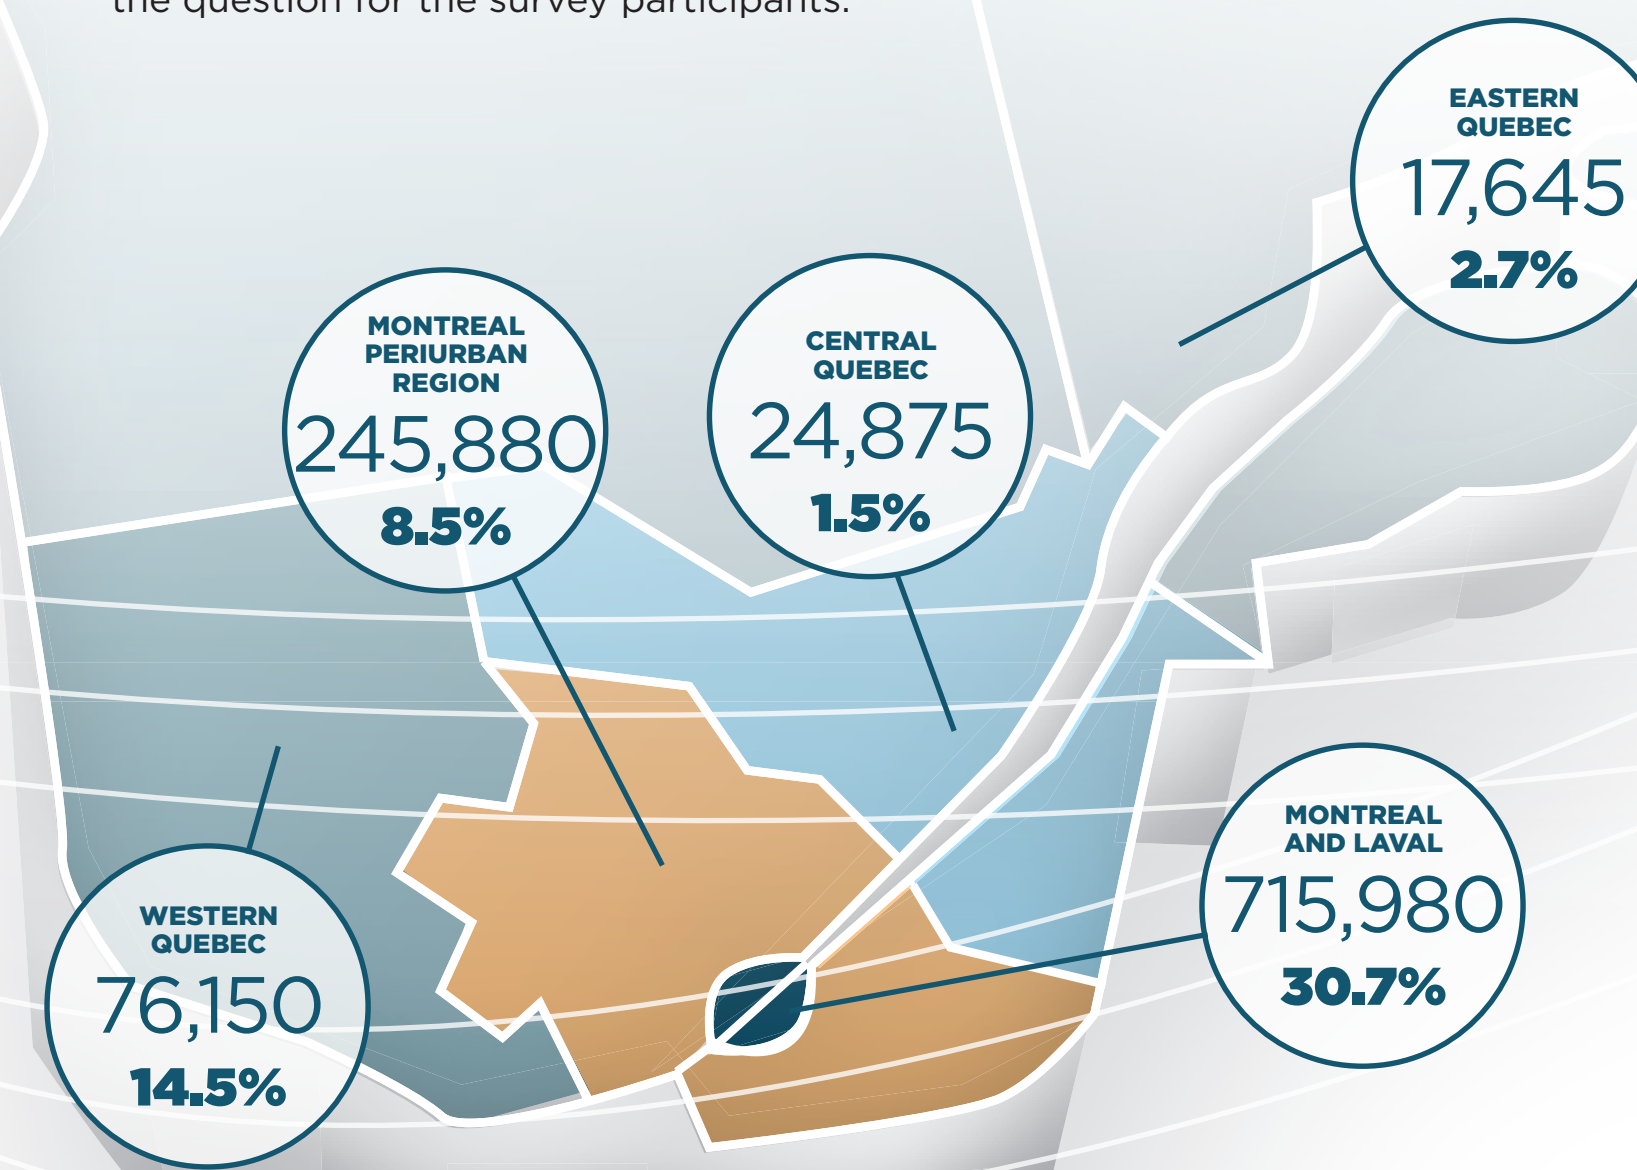

## DISTRIBUTION OF ANGLOPHONES

Region	Population	Percentage
<b>Eastern Quebec</b>	<b>17,645</b>	<b>2.7%</b>
Bas St-Laurent	1,225	0.6%
Saguenay-Lac-St-Jean	1,970	0.7%
Côte-Nord	5,180	5.7%
Nord-du-Québec*	445	3.1%
Gaspésie-Îles-de-la-Madeleine	8,825	9.1%
<b>Central Quebec</b>	<b>24,875</b>	<b>1.5%</b>
Québec (Capitale nationale)	14,825	2.1%
Mauricie-Centre-du-Québec	6,065	1.2%
Chaudière-Appalaches	3,395	1.0%
<b>Montreal periurban region</b>	<b>245,880</b>	<b>8.5%</b>
Lanaudière	13,990	2.9%
Laurentides	37,990	6.5%
Montréal	156,200	11.6%
Estrie	37,700	8.1%
<b>Montreal and Laval</b>	<b>715,980</b>	<b>30.7%</b>
Montréal	625,000	32.6%
Laval	90,980	21.8%
<b>Western Quebec</b>	<b>76,150</b>	<b>14.5%</b>
Outaouais	70,885	18.7%
Abitibi-Témiscamingue	5,265	3.6%

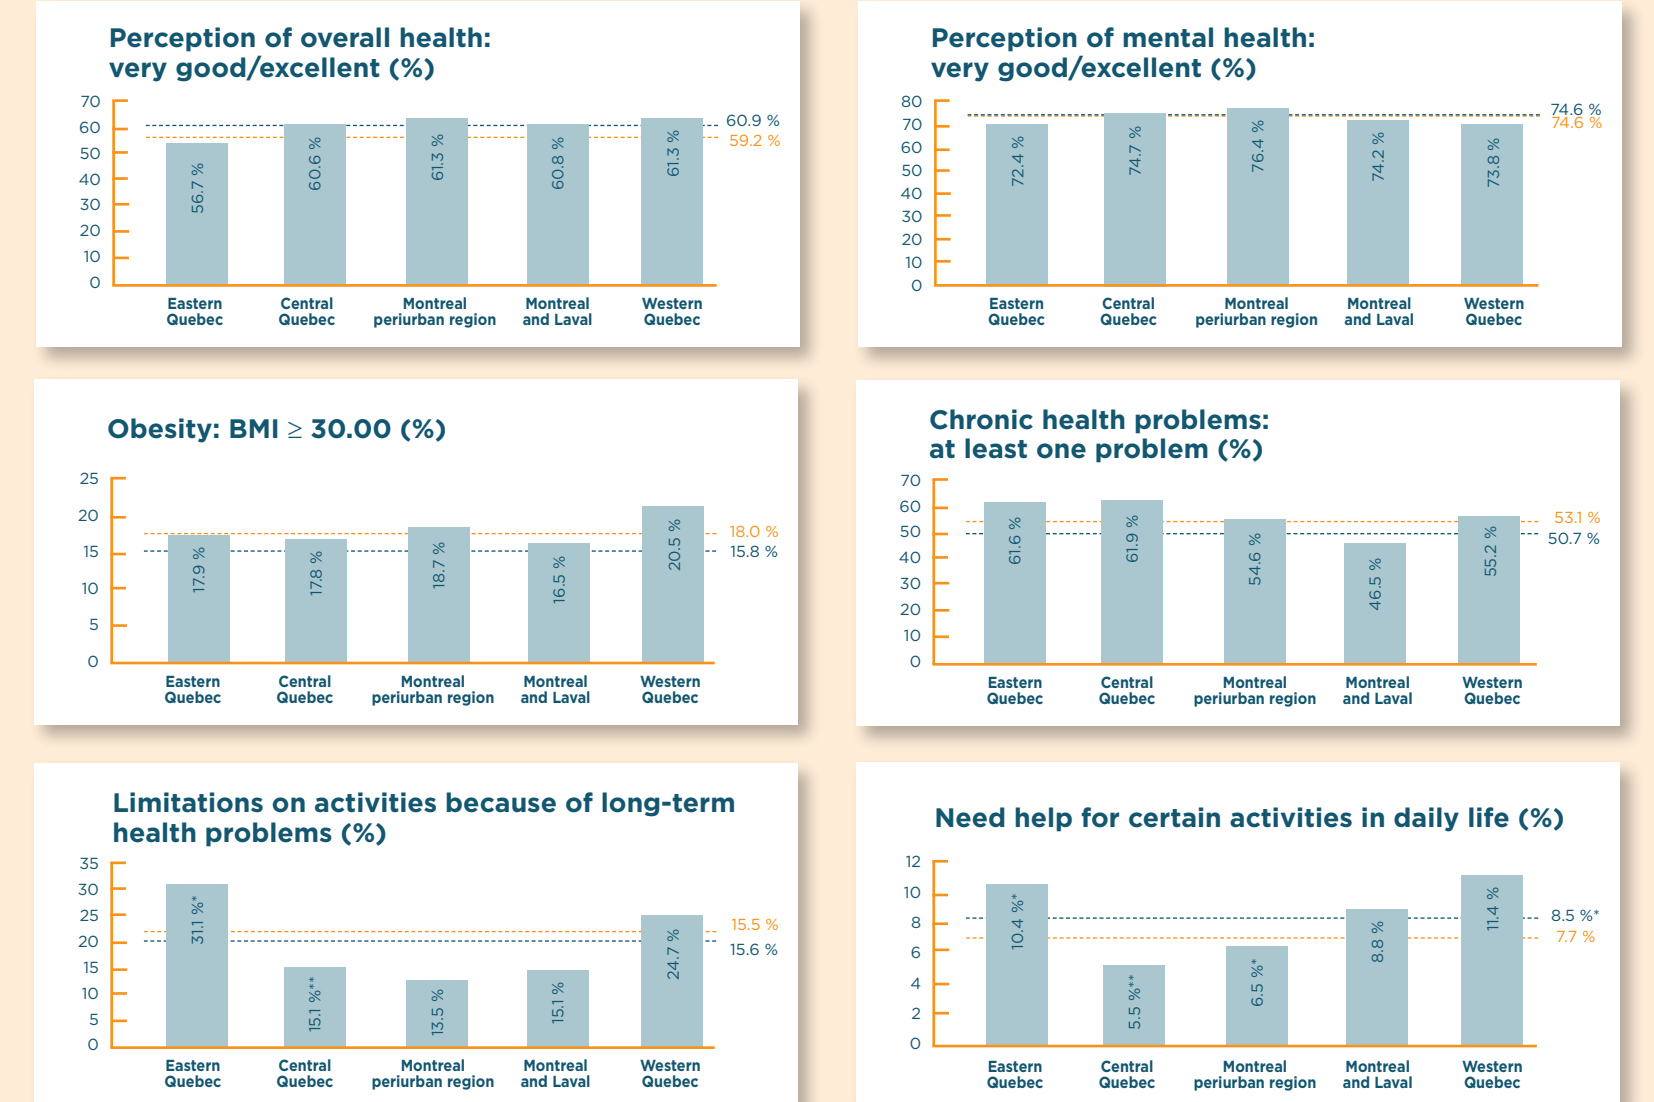

\*Does not include the First Nations population of the health region of Terres-Cries-de-la-Baie-James nor the population of the health region of Nunavik.  
Source: Statistics Canada, Census of Population, 2016. English, First Official Language Spoken, Quebec. The data includes the category "English" and half of the category "English and French". CHSSN custom table CO-1796.

This poster presents a selection of indicators describing various aspects of health of the official language minority Anglophone population in various regions of Quebec.

These indicators are drawn from a secondary analysis of the Canadian Community Health Survey (CCHS), combining the 2011-2012-2013-2014 cycles to compensate for the low sample of Anglophones. The weighted data are based on a sample of 45 786 persons: 3 519 Anglophones and 42 267 Francophones. The linguistic groups were identified using an algorithm that filtered French and English speakers according to four variables found in the CCHS: conversation language, mother tongue, interview language, and preferred contact language during the survey. When sample size per region is too small, data remains confidential. Non-available data means that the province / territory did not select the question for the survey participants.

## PERCEPTION OF HEALTH AND LIMITATIONS

## USE OF HEALTHCARE SERVICES

### DATA SOURCES:

Statistics Canada, Canadian Community Health Survey (CCHS 2011-2012-2013-2014). The analyses presented in this infographic were produced at the Carleton, Ottawa, Outaouais Research Data Centre (COOL RDC), a member of the Canadian Research Data Centre Network (CRDCN) supported by the Social Sciences and Humanities Research Council (SSHRC), the Canadian Institutes of Health Research (CIHR), the Canada Foundation for Innovation (CFI), and Statistics Canada. The ideas expressed in this text are those of the authors alone.

### CONVENTIONAL SIGNS

- Anglophone minority
- Francophone majority
- \* Coefficient of variation between 16.6% and 33.3%; interpret with caution
- \*\* Coefficient of variation greater than 33.3%; rough estimate, provided for information purposes only
